VIOND

Web & VR Software Engineer (m/w)

München, full time

About the job

As a Web & VR Software Engineer at Viond, you help us building and expanding the best platform for interactive 360 experiences. Within a multinational and interdisciplinary team, you develop the newest features for Viond and experience the development of our innovative product. Your working time at Viond will be characterized by personal appreciation, mutual respect and honesty. And we also offer the whole start-up lifestyle: Your second family, table soccer, limitless caffeine and daily fresh fruits. Get to know us – we are looking forward to welcoming you.

Your responsibilities

- Work on Viond's Web VR player
- Develop Web applications
- Support development of server-side components
- Develop native VR mobile applications

Your skills

- University degree in computer science, informatics or similar field and a comprehensive understanding of software engineering principles
- Three-year experience with C# or Java
- Experience working with ASP.NET, PHP or Node.js
- Experience integrating REST APIs and an understanding of SPA web applications
- Advanced knowledge of JavaScript frameworks like React.js, Angular.js and jQuery

A plus if you have:
- Experience in developing REST APIs
- Knowledge of Web VR frameworks like WebVR (WebXR), A-frame, ReactVR
- Developed VR or AR applications in Unity or Unreal

Also, you are used to develop new products within a team, but you are also capable of working and learning independently. In addition, you are able to speak and write in English fluently.

About Viond

Viond is a Munich Start-Up founded in 2018 with the aim to establish interactive 360° Virtual Reality experiences as a new entertainment and productive medium on the market. An easy-to-use integrated platform, Viond let's every user create impressive virtual worlds within minutes. Without the need for VR programming skills, Viond enables creatives, agencies and businesses to create interactive 360 VR experiences with comprehensive features. Such a platform is unique in the world and will enable an enormous creative potential to open up within the VR medium.

Viond is a spin-off of RE'FLEKT GmbH, one of the worldwide leading specialists for VR and AR applications. In the long-term, Viond strives to establish its platform as the leading application for creating interactive 360 VR experiences and to set the industry's standard.

About the position: offices located in Munich, 40 hours / week, working hours are flexible, attractive salary, start as soon as possible.
